

SPACE DEX ECOSYSTEM

BOOST YOUR TRADES
TO THE MOON

WWW.SPACE-DEX.IO

SpaceDex is a decentralized spot and perpetual exchange with low fees (0.10%) and no price impact.

Trading is backed by a pool of multiple assets, rewarding liquidity providers through market-making, swap fees, and leveraged trading fees.

Prices are constantly updated using Chainlink Oracles that obtain prices from major exchanges by volume.

SpaceDex is a decentralized exchange, allowing trading to be possible without the need for a user or password.

The platform also uses an aggregated price, reducing the risk of temporary wick liquidations.

THE NATIVE TOKEN OF THIS DECENTRALIZED EXCHANGE IS **FALCON**

The idea was born with the aim of simplifying investments in cryptocurrencies, making the use of the decentralized platform accessible, universal, and profitable. We want people to find peace of mind when they think of SpaceDex as a means to invest and receive rewards.

We will offer all the tools offered by centralized exchanges, with a user-friendly interface, but maintaining privacy, asset self-custody, and blockchain security. Users can use SpaceDex while maintaining their privacy in transactions, as well as control of their funds.

THE GOAL IS TO POSITION SPACEDEX WITHIN THE **TOP 100** TRADING VOLUMES
IN THE **NEXT 12 MONTHS.**

SpaceDex is a decentralized multichain platform where you can trade selected pairs on different networks, offering the lowest fees on the market and 0% price impact where only you have custody of your assets.

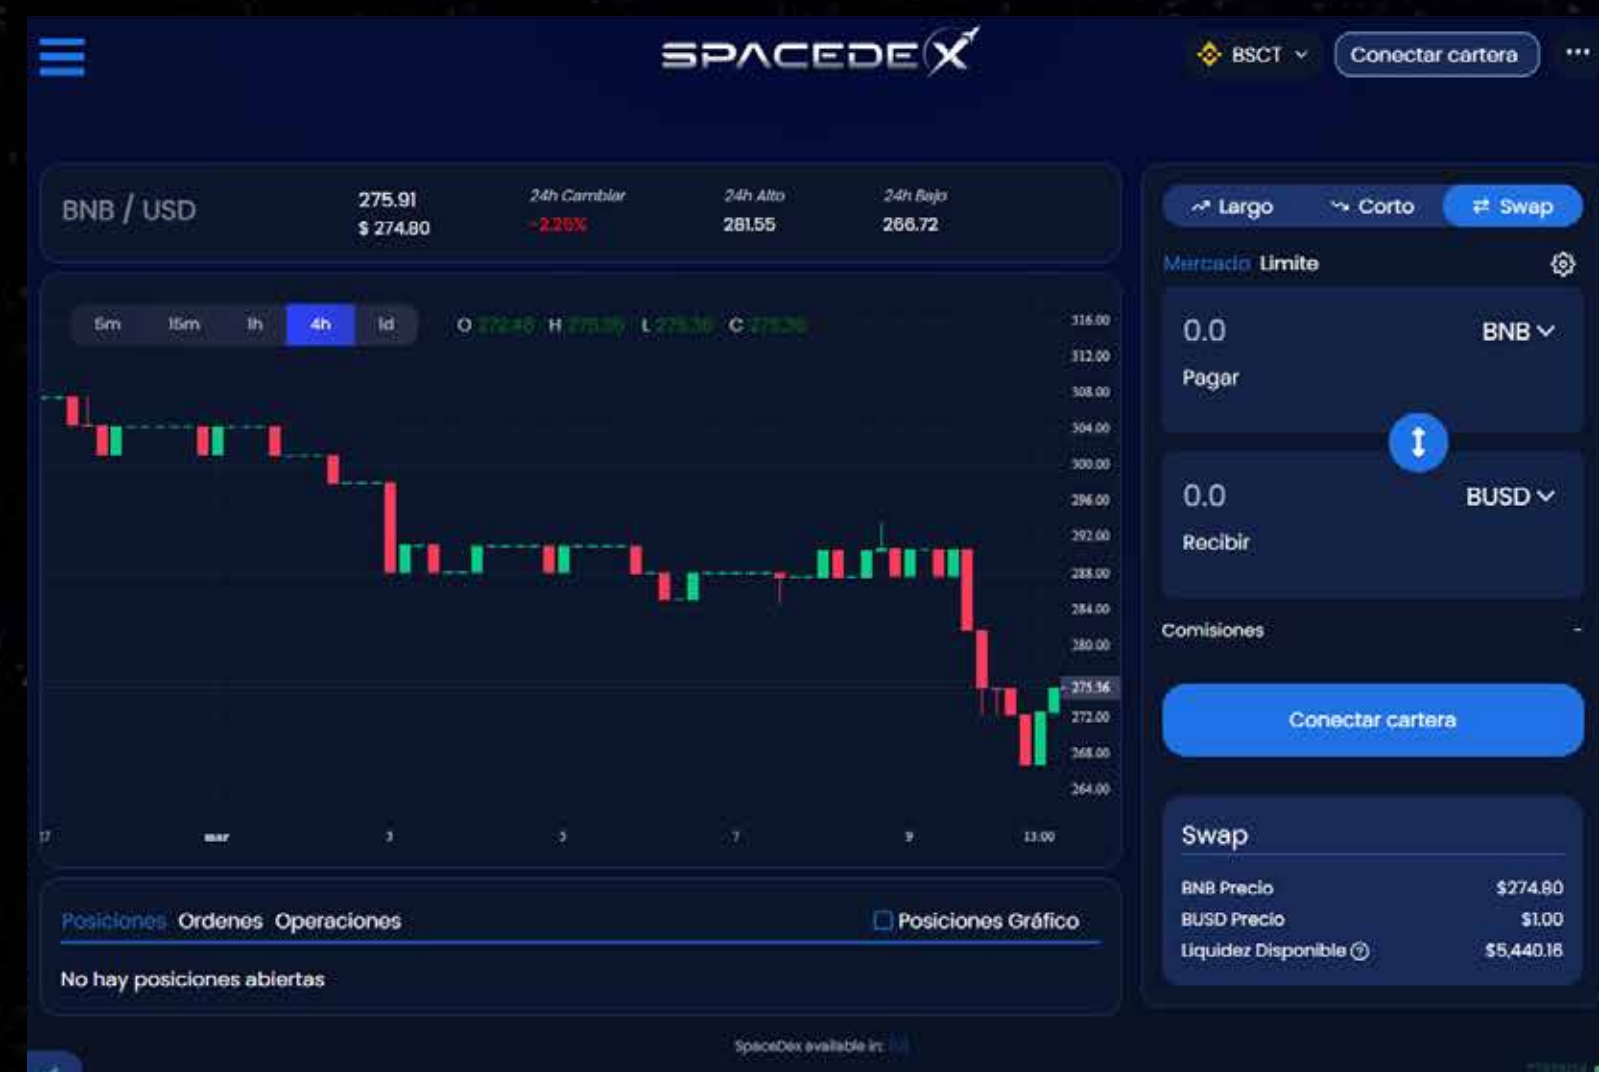

In SpaceDex you can:

SWAPS WITHOUT PRICE IMPACT

TRADE LONG

TRADE SHORT

Exchange and use stop-loss/take-profit orders without price impact on selected pairs

Leverage up to x10 and use stop-loss and take-profit orders on selected pairs.

Leverage up to x10 and use stop-loss and take-profit orders on selected pairs.

At **SpaceDex**, we want to offer the highest security for the user and the dex funds. For this reason, only assets within the top 10 market cap will be operable on our trading platform.

These assets are:

BNB

BTC

ETH

USDT

The operable tokens are the ones mentioned above. In case that it is not a native token of the network, wrapped tokens will be used. In the future, more assets may be implemented, but always within the top 10 of crypto assets.

In SpaceDex, **we also offer** the option to exchange all tokens on the Binance Smart Chain (BSC) thanks to our trading tool **SPACETOOLS**.

At **SpaceDEX**, we give you the opportunity to trade on your favorite network and move your **Falcon** tokens between different networks using a bridge.

NETWORKS WHERE WE WILL DEPLOY OUR PROTOCOL:

BSC

BSC is the first network in which we launch the protocol, available from 20/03/23 onwards.

POLYGON

Under development.

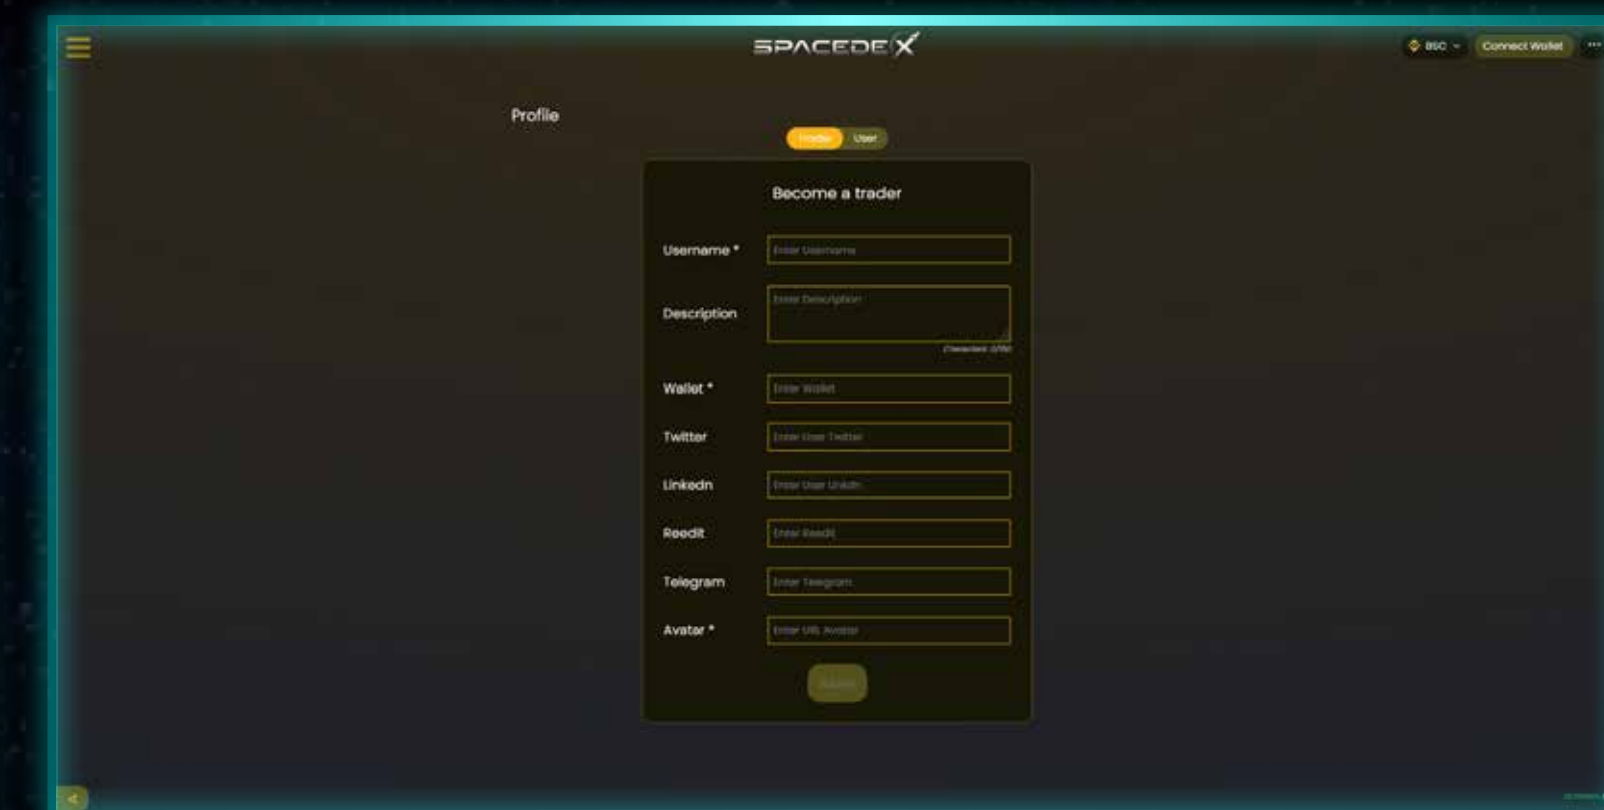

ARBITRUM

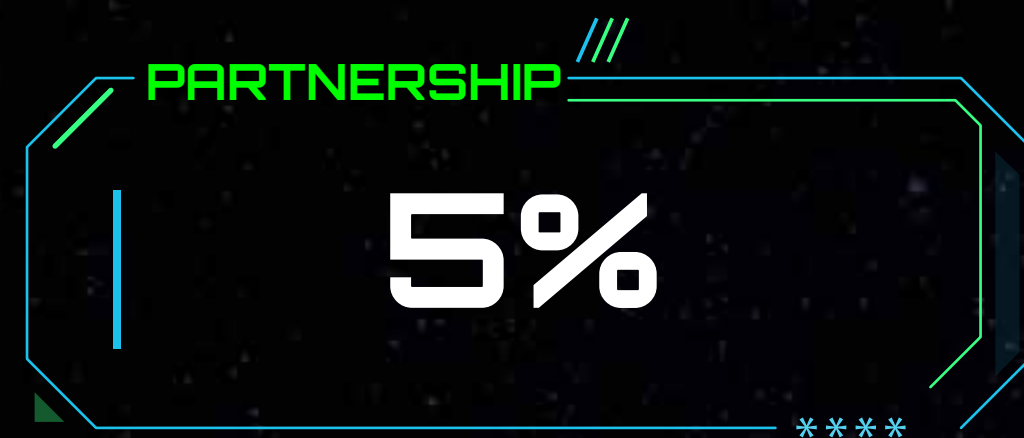

Under development.

COPY-TRADING (Under development.)

Within **SpaceDex**, we have developed a space where more advanced traders can create their profile inviting those who want to **copy their operations** to do so using our smart contracts.

No deposits, no registration, and always keeping control of your assets. Users can see the different profiles of traders, as well as their performance, and thus choose who to follow and copy their operations.

Falcon offers great rewards for staking for those who hold on the platform through the audited and secure staking contract. You can lock the Falcon tokens you buy and receive rewards in the governance token of the network in which you have your Falcon in stake.

This will happen by depositing your Falcon in the staking pool.

The return is generated and received in the token of the staking network. You can withdraw your tokens or reinvest them in Falcon to increase your future rewards.

25% of the fees generated from swaps and leverage trading will be converted and distributed among the entire Falcon token staking pool.

*Note that distributed fees are based on the number after deducting referral rewards and the price of the keeper network, the keeper price is usually 1% of the total fees.

All users can show their friends how much they like the platform with a referral link. As way of showing appreciation, SpaceDex will give all users who access the platform through a referral link discounts on fees, as well as a percentage of trading fees to the person who invited them.

Share your trading positions on the social networks you use most without leaving the platform.

All users can share their trades on different social networks such as Twitter, Instagram, and Facebook.

You can verify the performance of each trader through our platform. This means that novice users can analyze the strategies of more experienced users.

Liquidity providers receive a token whose value is determined by the collective price of the assets that make up the vault.

They receive rewards in BNB with an estimated APR of 14%. These rewards come from the fees of the dex (swaps, lending, leverage, liquidations).

Advantages for liquidity providers in the Space Dex protocol

Only in low-risk assets

(BTC, ETH, BNB, USDT)

Provide liquidity in a single asset.

(No need to make pairs)

Claim your rewards whenever you want.

(Receive your rewards in the token of each network and claim them when you want, without affecting your liquidity contribution)

LENDING - P2P (under development)

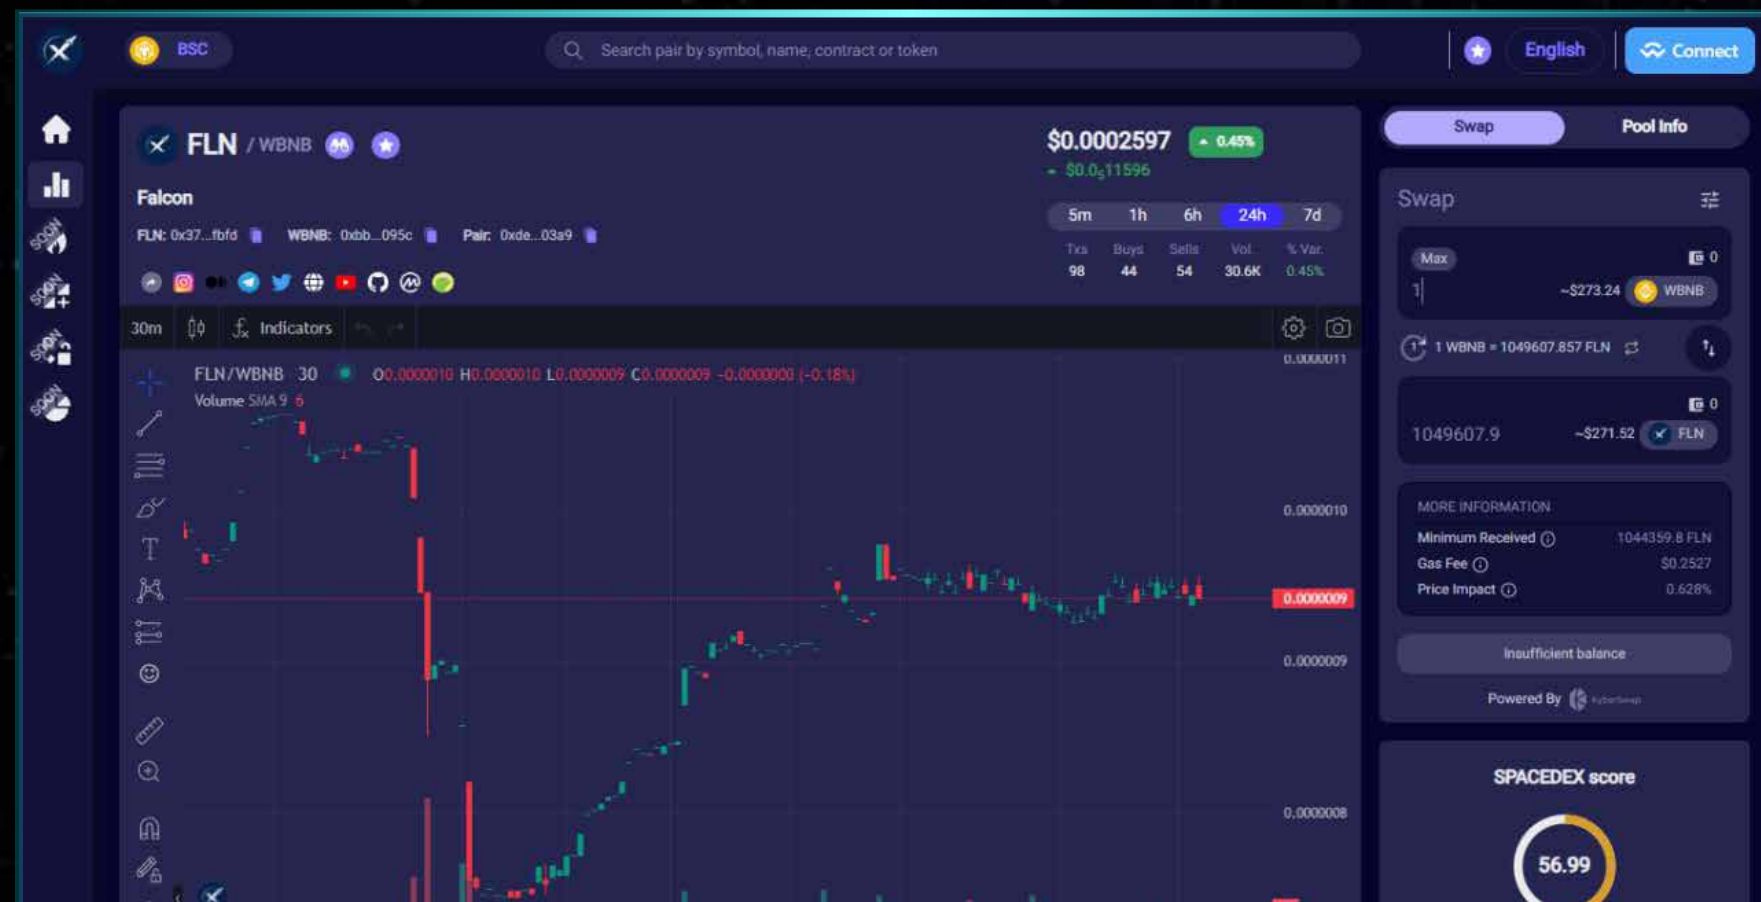

Peer-to-peer loans using our liquidity token as collateral. Users who want to get a loan in stable coins using their liquidity tokens as collateral can do so within our platform.

In this way, they can leverage their investment by obtaining up to 70% of the value of their liquidity tokens and diversify if they wish.

Lenders can earn interest on their stable coins with a maximum interest rate of up to 1% per month, with the additional advantage of receiving the rewards generated by the liquidity tokens while they are used as collateral for the loan.

In **Spacetools**, users can find all the information and operate their favorite tokens from the Bsc, Polygon and Arbitrum networks through our interface.

All updated to the v3 protocol of Uniswap since from April 2023 there will be a high volume of Dex using the protocol already released from its licenses.

Welcome to **Falcon**, our space shuttle. On our journey, you can trade on SpaceDex, learn with our trading courses, interact, share analysis, or debate with other users.

Our shuttle is constantly expanding, so new features and improvements will be introduced constantly.

Here you can see a small **technical demo** of our shuttle, still in development.

Q4 2022

- Launch and social media marketing.
- Presale and listing on Pancakeswap.
- Launch App on Testnet.
- Staking.
- Certik audit.

Q1 2023

- Completion of Certik audit.
- Launch App on Mainnet.
- Launch SpaceTools.
- SpaceDex Metaverse.
- AI technical support.

Q2 2023

- Copy trading.
- Trading bots.
- Development of more features for SpaceTools.

Q3 2023

- Expansion of SpaceDex to other networks.
- Development of more features for SpaceTools.

Q4 2023

- Lending.
- Development of more features for SpaceTools.

2024

- SpaceDex wallet app.
